# Activities and Services Associated with the Product

Appendix 2 to the Supply Agreement

## Table of contents

|          |  |          |
|----------|--|----------|
| <b>1</b> | <b>Activities and Services Associated with the Product</b> ..... | <b>2</b> |
| 1.1      | Tests .....  | 2        |
| 1.2      | Equipment.....   | 2        |
| 1.3      | Training of Designated Employees .....                           | 2        |

## **1 Activities and Services Associated with the Product**

The Supplier shall describe activities and services that must be performed before the product can be ordered and the service used.

### **1.1 Tests**

The Supplier shall state if any specific test results must be provided before the medicinal product can be ordered and used. It can be standard tests that are normally performed in hospitals or more specialised additional tests, such as blood tests, antivirus tests, stability testing, and re-resting.

### **1.2 Equipment**

The Supplier shall state if any specific equipment must be in place before the medicinal product can be ordered and used. It can be standard hospital or hospital pharmacy equipment or more specialised equipment, such as separate cold storage facilities.

### **1.3 Training of Designated Employees**

The Supplier shall describe what is meant by necessary training, for example what types of personnel at the Hospital / Hospital Pharmacy must undergo training, including any requirements for authorisation of the place of treatment.
