

Introduction to “Sykehusinnkjøp” process for gene and cell therapies

The Norwegian Hospital Procurement Trust

«Nye Metoder» and Sykehusinnkjøp HF

- “Nye Metoder” consist of three independent entities:
 - HTA - NoMA
 - Negotiations - Norwegian Hospital procurement trust
 - Reimbursement decision - The regional health authorities
- Sykehusinnkjøp HF
 - Operative responsibility for procurement for the specialist healthcare service
 - Owned by the four regional health authorities
 - Negotiate on behalf of the regional health authorities

Documents (framework for gene and cell therapies)

- The Norwegian Hospital Procurement trust uses standardized documents for the gene and cell therapies agreements
- The document packages consist of :
 - Framework agreement (between HTD and regional health authorities)
 - With attachments
 - Supply agreements (three-party agreement; Between treatment centre, pharmacy and HTD)
 - With attachments
 - Technical apheresis agreement (if relevant)
- The Norwegian version of the agreements should be signed
- The Norwegian Hospital Procurement (SHI) has coordinating role throughout the signing process
