

The Specialist Healthcare Service's Net Zero Supplier Roadmap

From
2023/2024

Contractual requirements for greenhouse gas emission reductions

Requirement for a Carbon Reduction Plan (CRP) for pharmaceutical procurements (Jan. 2023).
Start-up with requirement for science-based targets for carbon reductions for manufacturers in procurements of medical consumables (Feb. 2024).

From September/April
2025/26

Carbon Reduction Plan (CRP)

For new procurements within prioritised categories, suppliers are required to publish a CRP for their scope 1 and 2 emissions, and a subset of scope 3 emissions as a minimum.
From April 2026 this requirement is proportionally extended to cover all new procurements.

From April
2027

Carbon Reduction Plan for all emissions

All suppliers will be required to publicly report targets, emissions and publish a CRP for global emissions for all of their scope 1, 2 and 3 emissions.

From April
2028

Product-level requirements

New requirements will be introduced overseeing the provision of carbon footprinting for individual products supplied to the Specialist Healthcare Service. The Norwegian Hospital Procurement Trust will work with other public buyers, suppliers and industry associations to determine the scope and methodology.

2050: Low emission hospitals
